EXPERIENCE

Zura Ventures   India / Remote
Full Stack Intern   *Apr 2023 – Aug 2023*
- Developed revenue-generating B2B Shopify apps, including GiftKart, Easy Bundles, and Kite Free Gift, resulting in significant sales increases.
- Collaborated with cross-functional teams, implemented features, resolved issues, and optimized performance using Next JS, Redis, GraphQL, Koa, and Shopify API.

Cosmofeed   India / Remote
Software Engineering Intern   *Nov 2022 – Dec 2022*
- Contributed to a pre-release bio link app website, enhancing user experience and data gathering for potential customers.

Leadership & Community   On-Site & Remote
Various Roles   *Dec 2021 – Present*
- Served as Google DSC Lead, GDSC Web Lead, and Hacktoberfest Maintainer, managing teams and promoting coding best practices.
- Contributed as a Community Photography with 250k+ views, showcasing creativity and communication skills.

Open-Source & Personal Projects   Remote
Freelance Developer   *Dec 2021 – Present*
- Created and maintained open-source apps with 15,000+ users, solving technical problems and simplifying development tasks.
- Contributed to open-source projects, showcasing version control, code review, and collaborative development skills, from ideation to deployment conquering each small step SEO, LCP, Client Optimization and more.

AWARDS & ACHIEVEMENTS

LeanIn Hack IGDTUW 5.0 Top Team Developed the Sakhi app, aimed at empowering women and promoting gender equality. (Feb 2024)

HackJNU 3.0 Finalists Created an innovative UN SDG-focused app, addressing sustainable development goals. (Jan 2024)

Top 5 - IITB Techfest Developed 'Mernifier,' a MERN Stack assistant, showcasing multi dimensnional model powered by pinecone, langchain, OpenAI and several other modern world technologies. (Dec 2023)

Hackathon Winner Organised by Major League Hacking (June 2022)

5th Product of the day MDB (mdb.pushkaryadav.in) recognized by ProductHunt. (March 2021)

PROJECTS

Message Gator | *mg.writewrap.in*
- Developed an innovative SaaS platform for real-time message/review integration, enabling businesses to manage multiple customizable widgets and seamlessly integrate with a proprietary library. Implemented features for converting reviews into social media-optimized images (Notez integration), enabling direct mail replies with context, and more.

Notez | *notez.writewrap.in*
- Designed and built a user-friendly note-taking application with a focus on shareability and customization. Key features include creating shareable links and notes with various theme customizations, as well as downloading attention-grabbing, social media-ready images to drive engagement.

Mernifier | *mernifier.itsvg.in*
- Developed an AI-powered coding assistant leveraging cutting-edge technologies such as Pinecone (custom-trained on millions of tokens from a self-generated dataset), LangChain, OpenAI, and Gemini. Mernifier provides accurate and up-to-date responses on modern web technologies like Next.js 14, surpassing the capabilities of ChatGPT.

Sakhi | *github.com/vishwaGauravIn/sakhi*
- Worked on Sakhi, a mobile-first app tailored for women, encompassing daily journals, safety features, community, and holistic health tools. Sakhi empowers and supports women's well-being through features like a menstrual tracker, mood journal, emergency SOS, community forum, Sakhi chatbot, fact-checking, menstrual knowledge, self-defense tutorials, and locating nearby hospitals and police stations. Aligned with UN SDGs for Good Health and Well-being, Reduced Inequalities, and Gender Equality.

Additional projects showcasing a diverse range of skills and technologies can be found on my GitHub (github.com/pushkarydv) and professional portfolio (pushkaryadav.in).
