Professional Summary

Production applied-AI and full-stack fintech engineer with approximately 2 years of professional experience building reliable customer-facing systems. Owns products end-to-end across agentic workflows, RAG, tool calling, backend infrastructure, and web applications.

Experience

Amalgamic

Founding Engineer, Web & AI

Remote (US / India)

Sep 2025 – Present

- Own the fintech product end-to-end, building authentication, credit-bureau integrations, and Plaid-based card linking for transactions and liabilities.
- Implemented a Python financial-insights engine on AWS Lambda, including transaction classification and a financial-data lookup tool for agent workflows.
- Built an LLM financial chatbot with tool calling, strict session isolation, and <2s time to first token; added agentic workflows for subscription cancellations and disputes.
- Helped grow the engineering team from a solo build to a small team while continuing to own core platform architecture and end-to-end product delivery.

Frautect

Full Stack Developer, Web & AI

Remote

Dec 2024 – Aug 2025

- Built a large-scale app-store scraping pipeline processing 500K+ apps daily across Google Play and Apple App Store, maintaining a continuously refreshed fraud-detection dataset.
- Developed internal labeling dashboard for fraud classification: impersonation detection, brand linking, and sector categorization across 26K+ flagged applications.
- Engineered a Automated Fraud Tagging system combining RAG similarity search, icon matching, SLMs, and 10+ heuristic signals, achieving 90%+ accuracy.

Zura Ventures (Skai Lama)

Software Engineer Intern

India / Remote

Apr 2023 – Aug 2023

- Developed high-impact B2B Shopify apps serving 10K+ merchants with \$2M+ combined revenue using MongoDB, GraphQL, Shopify APIs, and React-Polaris.
- Independently built and shipped “Kite Free Gifting App” end-to-end; 5-star rated and one of the brand’s most adopted apps.

Freelance & Open Source

Independent Developer (Part-time)

Remote

Dec 2021 – Sep 2025

- Built and shipped 20+ developer tools and products used by 25K+ users including Markdown Badges (#5 Product of the Day on ProductHunt), Message Gator (73K+ requests served), Anomm, and Tweeco.
- Recognized by Microsoft for Startups for WriteWrap Labs tools. View all projects: github.com/pushkarydv — pushkaryadav.in

Technical Skills

Languages: JavaScript, Python, C, PHP, Shell

Frontend: React, Next.js, TailwindCSS, Polaris, Electron.js, Framer

Backend: Node.js, Express.js, MongoDB, PostgreSQL, Prisma, GraphQL, Firebase, AWS Lambda

AI/ML: LangChain, Pinecone, RAG Pipelines, OpenAI APIs, Tool-calling Agents, Custom ML Pipelines

Tools: Git, GitHub Actions, Docker, Figma, FFmpeg, Plaid API, Shopify APIs

Education

Rajasthan Technical University, Kota

B.Tech in Computer Science, Graduated 2025

2021 – 2025

Selected Achievements

- Top 5 at **IIT Bombay Techfest**: Built MERNifier, an AI coding assistant using LangChain and Pinecone (Dec 2023)
- **Major League Hacking** Hackathon Winner (Jun 2022); **Google Developer Student Club Lead** (2023–2024)
- **#5 Product of the Day** on Product Hunt for Markdown Badges (Mar 2021)
