Experience

Amalgamic

Founding Engineer, Web & AI

Remote (US / India)

Sep 2025 – Present

- Architected and built the full-stack fintech platform from ground up: user auth, credit bureau integration, Plaid-based card linking for transactions and liabilities across all user credit cards.
- Designed event-driven financial insights engine using AWS Lambda, processing transaction data to surface fees, subscriptions, spend categories, and actionable bureau insights in real time.
- Built an AI-powered financial chatbot with tool-calling architecture; session-aware with cross-user data leakage prevention, achieving <2s TTFT on complex financial queries.
- Integrated agentic workflow system enabling users to assign tasks (subscription cancellations, disputes) via chatbot with automated email notifications through tool calls.
- Scaled engineering team from 1 to multiple engineers as product moved into active user testing in the US market.

Frautect

Full Stack Developer, Web & AI

Remote

Dec 2024 – Aug 2025

- Built large-scale app store scraping pipeline processing 500K+ apps daily across Google Play and Apple App Store, maintaining a continuously refreshed fraud detection dataset.
- Developed internal labeling dashboard for fraud classification: impersonation detection, brand linking, and sector categorization across 26K+ flagged applications.
- Engineered AFT (Automated Fraud Tagging) system combining RAG-based similarity search, icon image matching, SLMs, and 10+ heuristic parameters, achieving 90%+ detection accuracy.

Zura Ventures (Skai Lama)

Software Engineer Intern

India / Remote

Apr 2023 – Aug 2023

- Developed high-impact B2B Shopify apps serving 10K+ merchants with \$2M+ combined revenue using MongoDB, GraphQL, Shopify APIs, and React-Polaris.
- Independently built and shipped “Kite Free Gifting App” end-to-end; 5-star rated and one of the brand’s most adopted apps.

Freelance & Open Source

Independent Developer

Remote

Dec 2021 – Sep 2025

- Built and shipped 20+ developer tools and products used by 25K+ users including Markdown Badges (#5 Product of the Day on ProductHunt), Message Gator (73K+ requests served), Anomm, and Tweeco.
- Recognized by Microsoft for Startups for WriteWrap Labs tools. View all projects: github.com/pushkarydv — pushkaryadav.in

Technical Skills

Languages: JavaScript, Python, C, PHP, Shell

Frontend: React, Next.js, TailwindCSS, Polaris, Electron.js, Framer

Backend: Node.js, Express.js, MongoDB, PostgreSQL, Prisma, GraphQL, Firebase, AWS Lambda

AI/ML: LangChain, Pinecone, RAG Pipelines, OpenAI APIs, Tool-calling Agents, Custom ML Pipelines

Tools: Git, GitHub Actions, Docker, Figma, FFmpeg, Plaid API, Shopify APIs

Education

Rajasthan Technical University, Kota

B.Tech in Computer Science, University Department

2021 – 2025

Achievements

- Top Team at **LeanIn Hack IGDTUW 5.0**: Designed the Sakhi app for women’s empowerment (Feb 2024)
- Finalist at **HackJNU 3.0**: Built an app addressing UN Sustainable Development Goals (Jan 2024)
- Top 5 at **IIT Bombay Techfest**: Built MERNifier, an AI-powered coding assistant using LangChain + Pinecone (Dec 2023)
- **Major League Hacking** Hackathon Winner (Jun 2022)
- **#5 Product of the Day** on ProductHunt for Markdown Badges (Mar 2021)
- **Google Developer Student Club Lead** (Jul 2023 – Jul 2024)
- 750K+ community photo views on **Pexels**, featured by India Today
